MONTICELLO, Ark. — Taylor Ashcraft of Warren has been honored by the School of Mathematical and Natural Sciences at the University of Arkansas at Monticello with outstanding student awards.

Ashcraft, a sophomore biology and biochemistry double major that plans to attend pharmacy school, received the Walter Godwin Award, presented annually to UAM's outstanding student in General Chemistry, and also the Ed Bacon Award which goes to the top student in Principles of Biology. The chemistry award is named for Dr. Walter Godwin, a professor emeritus of chemistry who served on the UAM faculty from 1974 until his retirement in 2007. The Bacon Award is named for Dr. Ed Bacon, a professor emeritus of biology. Dr. Bacon is currently an adjunct professor of biology, and was a member of the UAM faculty from 1974 until his retirement in 2007.

Ashcraft is a 2012 graduate of Warren High School. She has twice been named to the Chancellor's List, which requires a grade point average of 4.0 on at least 12 semester hours of course credit. She is a member of the Ambassadors, which is a campus service organization, and is a member of the Alpha Sigma Alpha sorority.

“Taylor is an excellent student with outstanding work ethic,” said Dr. Morris Bramlett, Dean of the School of Mathematical and Natural Sciences. “This is a great honor and a tribute to her hard work and dedication in the classroom.”
